PROFESSIONAL SUMMARY

Bioresource Engineering graduate (McGill, 2025) relocating to Vancouver with research experience in stormwater systems, urban ecology, engineering for sustainability, and anaerobic digestion systems. Awarded the CSABE | SCGAB Undergraduate Thesis Award and Stuart Horne Scholarship in Water Management. Over a decade of culinary leadership which developed precision, composure, and operational efficiency in high-demand environments.

EDUCATION

B.Eng., Bioresource Engineering | *McGill University* 2021 – 2025 • Montreal, QC

B. Sc, Natural Resource Management | *University of British Columbia* 2010 – 2012 • Vancouver, BC

SELECTED EXPERIENCE

Chef | *Resilience Montreal* Jan 2026 – Present • Montreal, QC

- Prepare and serve up to three hot meals daily at a non-profit day shelter supporting the local First Nations and Inuit community, including individuals experiencing homelessness and crisis.
- Manage food service operations in a resource-constrained environment, applying professional kitchen standards to a community care context.

Research Assistant | *IRBV, Université de Montréal* May – Aug 2025 • Montreal, QC

- Authored the standardized field sampling protocol adopted across four countries (Canada, Sweden, Estonia, France) for BIORESTORM, an international initiative evaluating nature-based solutions in urban stormwater systems.
- Conducted multi-parameter analysis of de-icing salt impacts on urban trees. Field analysis consisted of measuring water levels, soil conductivity, and mineral ion concentrations.

Capstone Design Project | *BREE 490/495 – McGill University* Jan – Dec 2025 • Montreal, QC

- Designed a zero-waste digestate management system for a Kentucky biogas facility processing whiskey distillery waste. Created a cost-effective nutrient and organic resource recovery process across four post-digestion stages.
 - Designed, built, and experimentally validated a custom photobioreactor to optimize microalgae-based nutrient removal from liquid digestate.
- Awarded the CSABE | SCGAB Undergraduate Thesis Award (2025) — [\[View Report\]](#)

Sous Chef | *Double's Late-Night* May – Aug 2024 • Montreal, QC

- Led kitchen operations for a new team; reduced food waste, developed seasonal menus with local ingredients, and implemented a composting program to meet municipal regulations.

Chef de Partie | *Vin Mon Lapin* Jun–Aug 2022 & Jun–Aug 2023 • Montréal, QC

(*North America's #5 Ranked Restaurant*)

- Executed market-driven menus while managing inventory and vendor coordination.

TECHNICAL SKILLS

Software & Tools: MATLAB, QGIS, AutoCAD, Fusion 360, LaTeX, 3D Printing, Microsoft Office

Modelling: Hydrological Modelling, QSWAT, RZWQM2, RETC, CHEMFLO, HYDRUS

Technical: Water Quality & Field Sampling, Experimental Design, Technical Writing

Other: Team Leadership, Class 5 Driver's License

AWARDS & ACHIEVEMENTS

- | | |
|--|---------|
| • CSABE SCGAB Undergraduate Thesis Award – McGill University | 2025 |
| • Stuart Horne Scholarship in Water Management – McGill University | 2025 |
| • VP, Fermenters & Brewers Club – McGill University | 2023–24 |
| • Eagle Scout Rank & William T. Hornaday Award – Boy Scouts of America | 2010 |
